Abstract of JP 10187267 (A)

PROBLEM TO BE SOLVED: To execute suitable and efficient charging processing in accordance with the contents and providing formats of information commodities in a system for distributing the information commodities and to construct the information commodity distributing system.

SOLUTION: The information distributing system for providing each information commodity 10 requested from a user by using an information communication system is provided with an information storage device 1 for storing each information commodity 10 consisting of contents 10A to be an information body and charging attribute information 10B. An information providing system 2 retrieves the information commodity 10 corresponding to the user's request, executes providing processing and outputs a charging processing request to an accounting system 3. The system 3 executes prescribed accounting processing by using the charging attribute information 10B corresponding to the specified information commodity 10.
